capturing the

J.L.O GLOW

No time for a trip to the tropics before your big day? No problem, says makeup artist **Ramy** of **Ramy Beauty Therapy**. In fact, he says, forget the tan—you can easily capture Jennifer Lopez' sun-kissed glow right at home. Good skin is essential for this look, and Ramy recommends using **Vitamin C Serum** for a few months prior to your wedding to even out your skin tone. Before applying any makeup, **exfoliate** your skin, then start with a good **foundation** that has a dewy, semimatte finish. Use a bronzing makeup instead of a self-tanner, because it's easier to apply and less likely to cause a skin reaction. Choose the shade of **bronzer** that complements your skin tone—being careful not to go too dark. Apply it lightly across your face, paying special attention to the area around your eyes and hairline. Use a **shimmer stick** on your eyelids and cheekbones, followed by a touch of blush on the cheeks. This lovely, luminous skin requires barely there eye makeup and lipstick.

So you've got J.Lo's look—now you can smell like her, too, with her new fragrance, **Glow**, by J. Lo, a fresh combination of grapefruit, jasmine and vanilla. —Fiorella Valdesolo
