### Facial oils that fight acne

4 / 8

#### Susan Ciminelli Oil Control Formula

This word-of-mouth wonder helps clear pimples and blackheads. It contains thyme, which you want because it was found to be **more effective against acne than benzoyl peroxide** (the controversial main ingredient in Proactiv). And a trio of anti-bacterial extracts—lemongrass, lavender, and cajeput bark—gives it a sinus-clearing scent. This simple blend of oils is actually super active, so it's probably not a fit for super sensitive, inflamed skin.
